

Silvianna 1.1.0 Roadmap

This documents details the planned features for Silvianna 1.1.0. Please note that this document highlights the expected features for that version, but it may be necessary to move some for a future release.

New Features

- Notifications for airing episodes.
- Ability to configure airing notifications: Enable or disable them, choose the preferred airing time - users can choose to be notified right when they air, before they do, or after they have aired. The Free version of the app will be limited to one notification per day and it won't let users change the notification time.
- Custom icons for the Basic colors on Anilist, including Dark variations. Changing the app icon is a Pro Feature.
- User search.
- Character profiles.
- Character search.
- Character section in media.
- Review prompt.
- Lets you modify the **Priority** of media when editing or adding items to your list.
- Tap time spent watching anime to toggle between showing days and a formatted time.
